

Stotz Feinmesstechnik GmbH and Advanced Machine & Engineering are pleased to announce a distribution agreement for sales and service of the Stotz product lines in North America. This agreement will phase out the Stotz USA office and transition the product line to Advanced Machine & Engineering Co. in Rockford, IL. Chris Koehn, who ran the Stotz USA office for 10 years, is joining Advanced Machine & Engineering Co. as the Business Unit Manager for the Stotz products, which will allow a seamless transition for the customers.

Advanced Machine & Engineering Co. has been an industry leader for over 40 years. They continually look for innovative ways to improve their products and services. They have a state of the art facility with over 133,000 square feet that includes CNC turning machines, machining centers, boring mills, grinding machines and inspection equipment. They have chosen selective partnerships with some of the most advanced technology companies in the machining industry. They are ISO-9001 certified and innovate within a framework of ISO compliance, and deliver precision components that meet or exceed every ISO metric.

Stotz Feinmesstechnik GmbH has been a leader in gaging technology for almost 60 years. They design, manufacture and sell air-electronic gages and control devices. They are constantly striving to improve their designs and develop new products to solidify their position as a leader in new measuring technology and numerous patents within the last few years have solidified their position as a trendsetter for new measuring technology and pneumatic measuring systems. Their diverse customer base includes many industries including manufacturers and suppliers to the automotive, aerospace and medical industries.

Together we feel that this agreement will provide the best that both companies can offer to our customers. This will start with the high quality parts and innovative designs that Stotz Feinmesstechnik provides and end with the sales, service and industry expertise that Advanced Machine offers. We feel that we will be able to offer the best experience for the customer for finding solutions, quoting, sales, service and after sale support.

We are excited about moving forward together.

Best Regards,
